

Figure 10 is a line graph showing the FWHM ENC [keV] (Y-axis, ranging from 0 to 60) versus Peaking times (X-axis, ranging from 0 to 7). The graph displays multiple data series, each represented by a different colored line with markers. A red '4 keV' label is present near the bottom left of the plot area. The data points for all series are generally low, mostly below 10 keV, and show a slight increase around peaking time 4.
