

Figure 10 is a bar chart showing the FWHM ENC [keV] versus Peaking times for 1000000 events. The x-axis represents Peaking times from 0 to 7, and the y-axis represents FWHM ENC [keV] from 0 to 35. The chart displays multiple colored bars for each peaking time, indicating the distribution of FWHM ENC values. The values generally increase with peaking time, with a notable peak around 6.8.
